

# 2009 FINANCIAL HIGHLIGHTS

Thompson Creek achieved lower unit cash costs in 2009 while production was approximately the same as the previous year.

## MOLYBDENUM PRODUCTION

## WEIGHTED-AVERAGE CASH COSTS

## REVENUES

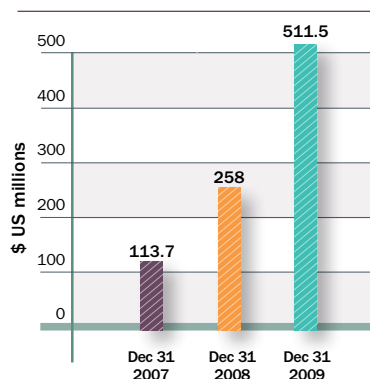

## CASH FLOW FROM OPERATIONS

A 62% decline in the average realized price on molybdenum sales in 2009 led to significantly reduced revenues and cash flow from operations.

Thompson Creek's financial position improved considerably as cash balances (including short-term investments) rose and debt was reduced.

## CASH + SHORT-TERM INVESTMENTS

## DEBT OUTSTANDING
