**Notes to the Consolidated Financial Statements**  
**Three and Six Months Ended June 30, 2008**  
**(Unaudited)**

**1. Description of Business**

Thompson Creek Metals Company Inc. (“Thompson Creek” or “the Corporation”) is a Canadian molybdenum mining company with vertically integrated mining, milling, processing and marketing operations in Canada and the United States (“US”). The Corporation’s operations include the Thompson Creek Mine (mine and mill) in Idaho, the Langeloth Metallurgical Facility (roasting and processing) in Pennsylvania and a 75% joint venture interest in the Endako Molybdenum Mine Joint Venture (“Endako Mine”) (mine, mill and roaster) in British Columbia.

In addition to its active mining and processing operations, the Corporation is permitting the Davidson molybdenum property (“Davidson Project”), located in British Columbia.

**2. Basis of Presentation**

The accompanying unaudited interim consolidated financial statements have been prepared according to Canadian generally accepted accounting principles (“Canadian GAAP”). All financial figures are presented in US dollars unless otherwise stated.

These unaudited interim consolidated financial statements include the accounts of the Corporation and its subsidiaries. The principal subsidiaries of the Corporation are:

- Thompson Creek Metals Company USA
- Langeloth Metallurgical Company LLC
- Thompson Creek Mining Co.
- Cyprus Thompson Creek Mining Company
- Thompson Creek Mining Ltd.
- Blue Pearl Mining Inc.

These unaudited interim consolidated financial statements also include the Corporation’s pro rata share of its 75% joint venture interest in the Endako Mine.

All intercompany accounts and transactions have been eliminated on consolidation.

**3. Accounting Changes and Accounting Policy Developments**

**Accounting Changes**

a) Financial Instrument and Capital Disclosures

Effective January 1, 2008, the Corporation adopted Canadian Institute of Chartered Accountants (“CICA”) handbook Section 3862, “Financial Instruments – Disclosure”, Section 3863, “Financial Instruments – Presentation”, and Section 1535, “Capital Disclosures”.

Section 3862, “Financial Instruments – Disclosure” and Section 3863, “Financial Instruments – Presentation”, replace existing Section 3861, “Financial Instruments – Disclosure and Presentation”. The new disclosure requirements of Section 3862 are to enable users to evaluate the significance of financial instruments on financial position and performance, as well as the nature and extent of risks the Corporation is

**THOMPSON CREEK METALS COMPANY INC.**

**(Unaudited)**

exposed to from financial instruments and how those risks are being managed. Section 3863 carries forward, unchanged, the presentation requirements of existing Section 3861.

Section 1535, "Capital Disclosures" requires the Corporation to provide disclosures on its objectives, policies and processes for managing capital.

The adoption of these new accounting standards did not impact the amounts reported in the Company's financial statements, however, it did result in expanded note disclosure (see Note 20 and Note 21).

b) Inventories

Effective January 1, 2008, the Corporation adopted the new CICA Handbook Section 3031, "Inventories". This new standard replaces the existing Section 3030 "Inventories" and provides more prescriptive guidance on the measurement and disclosure of inventory. Key requirements of this new standard include that inventories be measured at the lower of cost and net realizable value and the reversal of previous write-downs of inventory to net realizable value when there has been a subsequent increase in the value of this inventory. The adoption of this standard did not have any impact on the Corporation's financial statements.

**Accounting Policy Developments**

a) Goodwill and Intangible Assets

In February 2008, the CICA issued Section 3064, "Goodwill and Intangible Assets", replacing Section 3062, "Goodwill and Other Intangible Assets" and Section 3450, "Research and Development Costs". This new Section will be applicable to financial statements relating to fiscal years beginning on or after October 1, 2008. Accordingly, the Corporation will adopt the new standards for its fiscal year beginning January 1, 2009. Section 3064 establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets by profit-oriented enterprises. Standards concerning goodwill are unchanged from the standards included in the previous Section 3062. The Corporation is currently assessing the impact that the adoption of this standard will have on its financial statements.

b) Convergence with International Financial Reporting Standards

The CICA plans to transition Canadian GAAP for public companies to International Financial Reporting Standards ("IFRS"). The effective changeover date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The impact of the transition to IFRS on the Corporation's consolidated financial statements is not yet determinable.

**4. Derivative Financial Instruments**

a) Forward Currency Contracts

The Corporation uses foreign currency forward contracts to fix the rate of exchange for Canadian dollars at future dates in order to reduce the Corporation's exposure to foreign currency fluctuations on cash flows related to its share of the Endako Mine's operations. The terms of these contracts are less than one year. At June 30, 2008, the Corporation had open forward currency contracts with a total commitment to purchase Cdn\$24.0 million at an average rate of US\$0.99 (December 31, 2007 – Cdn\$21.0 million at an average rate of US\$1.04).

**THOMPSON CREEK METALS COMPANY INC.**  
**Notes to the Consolidated Financial Statements**  
**Three and Six Months Ended June 30, 2008**  
**(Unaudited)**

The Corporation does not consider these contracts to be hedges for accounting purposes and has determined these contracts to be derivative instruments, the fair value of which was a liability of \$0.1 million at June 30, 2008 (December 31, 2007 – liability of \$0.6 million). This liability has been included in accounts payable and accrued liabilities on the Corporation's consolidated balance sheets. For the three month period ended June 30, 2008, a gain of \$2.2 million has been included in other expense on the Corporation's consolidated statements of income related to these contracts (2007 – \$0.6 million gain). For the six month period ended June 30, 2008, a gain of \$1.5 million has been included in other expense related to these contracts (2007 – \$1.1 million gain).

b) Embedded Derivatives

The Corporation enters into agreements to purchase molybdenum at prices to be determined in the future. The future pricing mechanism of these agreements constitutes an embedded derivative which must be bifurcated and separately recorded. Changes to the fair value of the embedded derivative are included in the determination of net income. At June 30, 2008, the fair value of these embedded derivatives was a liability of \$0.1 million (December 31, 2007 – \$0.3 million). For the three month period ended June 30, 2008, a gain of \$0.7 million has been included in operating expenses on the Corporation's consolidated statements of income (2007 – \$13.2 million loss). For the six month period ended June 30, 2008, a gain of \$0.2 million has been included in operating expenses (2007 – \$13.2 million loss).

c) Forward Sales Contracts

The Corporation has forward sales contracts with fixed-price agreements under which it is required to sell certain future molybdenum production at prices that are different than the prevailing market price. Forward sales contracts in place at June 30, 2008 cover the period 2008 to 2011. At June 30, 2008, certain contracts have a positive mark-to-market value totaling \$2.0 million which has been included in other assets on the Corporation's consolidated balance sheets (December 31, 2007 – \$2.4 million). In addition, certain contracts have a negative mark-to-market value totalling \$7.8 million which has been included in severance and other liabilities on the Corporation's consolidated balance sheets (December 31, 2007 – \$9.5 million) (see Note 9). For the three month period ended June 30, 2008, a gain of \$1.5 million related to these forward sales contracts has been included in molybdenum sales on the Corporation's consolidated statements of income (2007 – \$1.1 million loss). For the six month period ended June 30, 2008, a gain of \$1.3 million related to these forward sales contracts has been included in molybdenum sales (2007 – \$8.9 million loss).

**7. Long-term Debt**

Long-term debt consists of:

(US\$ in millions)	<b>June 30 2008</b>	December 31 2007
First Lien	\$ —	\$ 236.1
Equipment loans	<u>5.4</u>	<u>6.7</u>

	<b>5.4</b>	237.4
Less: Current portion	<u>(3.3)</u>	<u>(67.2)</u>
	<b>\$ 2.1</b>	<b>\$ 170.2</b>

In June 2008, the Corporation made payments totaling \$219.4 million to fully settle remaining amounts owing on its First Lien credit facility. In connection with the repayment of the First Lien credit facility, the Corporation expensed the remaining \$4.4 million in deferred finance fees.

The Corporation's equipment loans are collateralized by mining equipment and are scheduled to mature no later than 2010. These loans bear interest at LIBOR plus 200 basis points. At June 30, 2008, the one-month LIBOR rate applicable to this facility was 2.46% (December 31, 2007 – 4.60%).

**8. Contractual Sales Obligations**

On acquisition of Thompson Creek Metals Company USA, the Corporation acquired a contractual agreement to sell up to 10% of certain production at the Thompson Creek Mine at an amount that may be less than the then prevailing market price. Deliveries under this contract commenced in 2007 and continue through to 2011. As at June 30, 2008, the Corporation had recorded a liability of \$8.6 million related to future deliveries under this agreement (December 31, 2007 – \$9.7 million). As this contractual agreement is satisfied by delivery of product, the liability is being drawn down with an offsetting adjustment to molybdenum sales in the determination of net income.

In the three month period ended June 30, 2008, \$0.6 million of this liability has been realized and released to molybdenum sales in the determination of net income (2007 – \$0.1 million). In the six month period ended June 30, 2008, \$1.1 million of this liability has been realized and included in molybdenum sales in the determination of net income (2007 – \$0.1 million).

**9. Severance and Other Liabilities**

Severance and other liabilities consist of:

(US\$ in millions)	<b>June 30 2008</b>	December 31 2007
Severance and retention liability	\$ 13.5	\$ 10.8
Forward sales contracts (Note 4(c))	<u>7.8</u>	<u>9.5</u>
	<u>\$ 21.3</u>	<u>\$ 20.3</u>

The Corporation maintains an employee severance and retention program for certain individuals employed by Thompson Creek USA. As at June 30, 2008, the Corporation had recorded a liability of \$13.5 million related to this program (December 31, 2007 – \$10.8 million). The Corporation has set aside funding for this liability by making periodic contributions to a trust fund based upon program participants' salaries. The trust fund assets totalled \$13.3 million at June 30, 2008 (December 31, 2007 – \$10.0 million) and have been presented as restricted cash, a long-term asset, on the Corporation's consolidated balance sheets.

**10. Asset Retirement Obligations**

The following table details items affecting asset retirement obligations for future mine closure and reclamation costs in connection with the Corporation's Thompson Creek Mine, Endako Mine and Davidson Project:

**12. Stock-based Compensation**

The Corporation uses the fair value method of accounting for stock-based compensation and recognized an expense of \$6.5 million and \$8.2 million for the three and six month periods ended June 30, 2008, respectively, (2007 – \$5.8 million and \$8.4 million, respectively,) for its stock-based compensation plan. The stock-based compensation expense recorded in each period includes costs related to option awards made during the period as well as the amortization of costs of prior period awards that did not vest at the grant date.

Options awarded by the Corporation have a term of five years and vest at the time of award or over a period of two years. The fair value of stock options granted was computed using the Black-Scholes option pricing model and the following weighted-average assumptions for the periods noted:

	<b>Three months ended</b>		<b>Six months ended</b>	
	<b>June 30</b>		<b>June 30</b>	
	<b>2008</b>	2007	<b>2008</b>	2007

**13. Commitments and Contingencies**

The Corporation has entered into commitments to buy Canadian dollars at future dates at established exchange rates (see Note 4)a).

The Corporation has committed to sell a certain amount of production at a defined price that may be less than market (see Note 4)c) and Note 8).

In the normal course of operations, the Corporation enters into agreements for the purchase of molybdenum. As at June 30, 2008, the Corporation had commitments to purchase approximately 5.4 million pounds of molybdenum, including approximately 2.6 million pounds in the balance of 2008 and 1.4 million pounds in each of 2009 and 2010.

As at June 30, 2008, the Corporation had commitments related to the purchase of major mill equipment for the Endako mill expansion of approximately \$49.6 million. These purchases are anticipated to be made over the next two year period.

In January 2008, a payment of \$100.0 million was made to the former shareholders of Thompson Creek Metals Company USA to settle an acquisition price adjustment recorded in 2007 related to the market price of molybdenum in 2007. The Corporation may be responsible for a further contingent payment in early 2010 of \$25.0 million if the average price of molybdenum exceeds \$15.00 per pound in 2009.

**14. Interest and Finance Fees**

**18. Related Party Transactions**

Consolidated sales to members of a group of companies affiliated with the other participant in the Endako Mine joint venture were \$65.9 million for the three month period ended June 30, 2008, representing 27.0% of the Corporation's total revenues for this period (2007 – \$46.5 million and 18.7%, respectively), and were \$120.1 million for the six month period ended June 30, 2008, representing 24.1% of the Corporation's total revenues for this period (2007 – \$92.6 million and 17.7%, respectively). For the three month period ended June 30, 2008, the Corporation recorded management fee income of \$0.2 million (2007 – \$0.1 million) and selling and marketing costs of \$0.4 million (2007 – \$0.3 million) from this group of companies. For the six month period ended June 30, 2008, the Corporation recorded management fee income of \$0.4 million (2007 – \$0.3 million) and selling and marketing costs of \$0.8 million (2007 – \$0.6 million) from this group of companies. At June 30, 2008, the Corporation's accounts receivable included \$19.3 million owing from this group of companies (December 31, 2007 – \$8.9 million).

Cash equivalents consist of deposits and money market instruments issued or guaranteed by major financial institutions and governments that have an original maturity date of less than 90 days.

**20. Financial Risk Management**

The Corporation's activities expose it to a variety of financial risks which include foreign exchange risk, interest rate risk, commodity price risk, credit risk and liquidity risk.

The Corporation enters into foreign exchange forward contracts, molybdenum forward sales contracts, molybdenum purchase contracts and an interest rate cap contract to manage its exposure to fluctuations in foreign exchange, molybdenum prices and interest rates. The Corporation does not trade derivatives.

**Foreign Exchange Risk**

The US dollar is the functional currency of the majority of the Corporation's activities. However, the Canadian dollar is the functional currency of the Corporation's interest in its joint venture operation. The Corporation has potential currency exposures in respect of items denominated in currencies other than the operations' functional currency. The Corporations foreign exchange exposures include:

- Transactional exposure on its investment in a Canadian dollar self sustaining operation as molybdenum sales are denominated in US dollars and the majority of operating expenses are in Canadian dollars;

## THOMPSON CREEK METALS COMPANY INC.

### Notes to the Consolidated Financial Statements

#### Three and Six Months Ended June 30, 2008

(Unaudited)

- Translational exposure on its investment in a Canadian dollar self sustaining operation whose net assets are exposed to foreign currency translation risk; and
- Transactional and translational exposure to Canadian dollar transactions and balances in US dollar functional currency operations.

The Corporation enters into foreign exchange forward contracts to manage these exposures. As at June 30, 2008, the Corporation had forward exchange contracts for Cdn\$24.0 million to sell US dollars / buy Canadian dollars at a weighted average exchange rate of US\$0.99. All foreign exchange forward contracts are due within the year. As at June 30, 2008, the fair value of these contracts is a liability of \$0.1 million.

For the three and six month periods ended June 30, 2008, with other variables unchanged, a \$0.01 strengthening (weakening) of the Canadian dollar against the US dollar would have an insignificant impact on net earnings and other comprehensive income.

#### Interest Rate Risk

The Corporation has invested and borrowed at variable rates. Cash and cash equivalents receive interest based on market interest rates. The Corporation's debt facilities are variable rate facilities based on LIBOR rates. The Corporation has entered into an interest rate cap agreement limiting the LIBOR rate to 6% on a specified amount of the First Lien credit facility.

For the three and six month periods ended June 30, 2008, with other variables unchanged, a 1% change in the LIBOR rate would have an insignificant impact on net earnings. There would be no effect on other comprehensive income.

#### Commodity Price Risk

The Corporation enters into molybdenum sales contracts where it sells future molybdenum production with fixed prices. These fixed prices may be different than the quoted market prices at the date of sale. The Corporation physically delivers molybdenum under these contracts; however, has chosen not to use the normal usage exemption and therefore treats these contracts as non-financial derivatives. The fair value is recorded on the balance sheet with changes in fair value recorded in revenue. The fair value is calculated using a discounted cash flow based on estimated forward prices. As long-term molybdenum prices are not based on an organized forward market, the Corporation uses the average of molybdenum price forecasts from various metals industry analysts as the estimated forward price.

As at June 30, 2008, the fair value of the Corporation's fixed forward sales contracts are as follows:

(US\$ in millions except per pound amounts)	2008	2009	2010	2011
Fair value – asset	\$ –	\$ –	\$ –	\$ 2.0
Fair value – liability	\$ 4.9	\$ 0.6	\$ 2.3	\$ –
Molybdenum committed (000's lb)	857	123	490	416
Average price (\$/lb)	\$ 27.52	\$ 25.00	\$ 17.00	\$ 21.00

# THOMPSON CREEK METALS COMPANY INC.

## Notes to the Consolidated Financial Statements

### Three and Six Months Ended June 30, 2008

(Unaudited)

The Corporation also enters into molybdenum purchase agreements with provisional pricing mechanisms where the final prices are determined by quoted market prices subsequent to the date of the purchase. As a result the value of the trade payable changes as the underlying market price changes. This component of the contract is an embedded derivative, which is initially recorded at fair value with subsequent changes in fair value recorded in operating expenses.

As at June 30, 2008, the Corporation's accounts payable and accrued liabilities included amounts owing related to purchases for 1.1 million pounds of molybdenum with provisional pricing mechanisms. The fair value of the Corporation's embedded derivative related to these liabilities was a liability of \$0.1 million at June 30, 2008. These contracts will mature within the year.

For the three and six month periods ended June 30, 2008, with other variables unchanged, a 10% change in molybdenum price would have an insignificant impact on the change in the fair value of the molybdenum forward sales contracts and the provisionally priced molybdenum purchase contracts. As at June 30, 2008, there would be no effect on other comprehensive income.

#### Credit Risk

The Corporation is exposed to credit risk from its accounts receivable and its money market investments. Counterparties to money market investments are established financial institutions and governments. The Corporation manages its credit risk from money market investments by establishing approved counterparties and assigning credit limits to each counterparty.

The Corporation manages its credit risk from its accounts receivable through established credit monitoring activities. As at June 30, 2008 the Corporation had five customers which owed the Corporation more than \$5.0 million each and accounted for approximately 58% of all receivables owing including a \$20.2 million balance relating to one customer group. There were a further two customers having balances greater than \$3.0 million but less than \$5.0 million that accounted for 7% of total receivables. The Corporation's maximum credit risk exposure is the carrying value of its accounts receivable.

#### Liquidity Risk

The Corporation manages its liquidity risk by maintaining cash and cash equivalent balances and by utilizing its line of credit. Surplus cash is invested in a range of less than 90 day money market instruments as per the Corporation's investment policy. As at June 30, 2008, the Corporation had an unutilized line of credit of \$22.5 million.

As at June 30, 2008, contractual undiscounted cash flow requirements for financial liabilities, including interest payments are as follows:

(US\$ in millions)		2008	2009 to 2011	2012 onward	Total
Accounts payable	\$	53.1	\$	—	\$ 53.1

**Financial Assets and Liabilities by Category**

As at June 30, 2008, the Corporation's financial assets and liabilities are categorized as follows:

(US\$ in millions)	<b>Loans and receivables</b>	<b>Held at fair value</b>	<b>Financial assets and liabilities at amortized cost</b>	<b>Total</b>
<b>Financial Assets</b>				
Cash and cash equivalents	\$ –	\$ 35.6	\$ 43.7	\$ 79.3

Long-term debt	\$ –	\$ –	\$ 5.4	\$ 5.4
Currency and commodity contracts	\$ –	\$ 7.9	\$ –	\$ 7.9

**Fair Values**

Cash equivalents represent money market instruments with maturity less than 90 days and are carried at fair value. The carrying value of accounts receivable, accounts payable and accrued liabilities approximate fair value due to the short maturity of these instruments. The currency and commodity contracts are derivative instruments and therefore they are carried at their fair value. The carrying amount of the long-term debt is at amortized cost and as it is variable rate debt its carrying value approximates fair value.

As at June 30, 2008, the carrying values and the fair values of the Corporation's financial assets and liabilities are shown in the following table:

(US\$ in millions)	<b>Carrying value</b>	<b>Fair value</b>
<b>Financial Assets</b>		
Cash and cash equivalents	\$ 79.3	\$ 79.3
Accounts receivable	\$ 109.3	\$ 109.3

**Pledged Financial Assets**

The Corporation has financial assets that are pledged for employee compensation and reclamation obligations. The Corporation maintains a separate trust fund to satisfy its obligation to employees under a severance and retention compensation arrangement. Reclamation deposits are maintained to satisfy the Corporation's obligation for future reclamation expenditures at its mine sites.

**21. Capital Risk Management**

The Corporation defines its capital as follows:

- Shareholders' equity;
- Long-term debt; and
- Short-term debt.

Capital as defined above as at June 30, 2008 and December 31, 2007 was as follows:

(US\$ in millions)	<b>June 30 2008</b>	December 31 2007
Shareholders' equity	\$ <b>819.3</b>	\$ 487.6
Long-term debt	<u>5.4</u>	<u>237.4</u>
	<u>\$ <b>824.7</b></u>	<u>\$ 725.0</u>

The Corporation's objectives with regard to its capital are:

- Maintain adequate capital to operate its business;
- Optimize debt levels;
- Comply with financial covenants on outstanding debt; and
- Incur short-term borrowing only to meet working capital needs.

The Corporation's capital structure is managed and adjusted as necessary by monitoring economic conditions, debt and equity markets, and changes to the Corporation's plans. Covenants relating to existing debt are monitored regularly to ensure compliance. Outstanding debt is reviewed from time to time to determine if it contains the most favourable terms available to the Corporation or if the Corporation should reduce the amount outstanding from cash available or new share issues.
